Performing Physician: Dr. Richard Patel, MD, FAAOS	Department: Orthopedic Surgery, Suite 4B

Section 3: Description of Procedure

The procedure described above has been explained to me by my doctor. I understand:

- The nature and purpose: repair of a torn anterior cruciate ligament (ACL) using minimally invasive arthroscopic technique
- Expected benefits: restored knee stability, reduced pain, return to normal activity within 6-9 months
- Possible risks and complications including:
 - Infection, blood clots (DVT), nerve or blood vessel damage, stiffness, graft failure
 - Adverse reaction to anesthesia including nausea, respiratory depression
- Alternatives: physical therapy alone, knee brace, activity modification, or total knee replacement if degeneration progresses
- Risks of declining: continued instability, cartilage damage, increased risk of osteoarthritis
